Environmental Policy

The President and top management of PSD Energy Pty Ltd are committed to protecting the environment and minimising the impact of our activities through responsible management of resources, prevention of pollution, and continual improvement of the Environmental Management System (EMS).

This Environmental Policy is appropriate to the purpose, nature, scale and environmental impacts of PSD Energy. It takes account of the organisation's context, including relevant environmental conditions and the needs of customers, employees, communities and other interested parties, and it supports the company's strategic direction.

We will achieve this by:

- Meeting all applicable environmental compliance obligations, including legislation, regulations and other requirements.
- Preventing pollution and protecting the environment, including, where relevant to our activities, climate change mitigation and adaptation, responsible use of natural resources, and protection of biodiversity and ecosystems.
- Integrating environmental responsibility into business planning, operations and decision-making, across the life cycle of our activities.
- Identifying and addressing environmental risks, and separately pursuing opportunities, to improve environmental performance.
- Reducing waste at source and promoting re-use, recycling and responsible disposal.
- Improving efficiency in energy and water use to reduce our environmental footprint.
- Consulting and training employees, subcontractors and others working under our control, so they are aware of this policy and can support environmental performance.
- Establishing and reviewing environmental objectives and targets that provide the framework for continual improvement.

This policy is maintained as documented information, communicated, understood and applied by employees, subcontractors and others working under our control, and made available to interested parties. Every person working for or on behalf of PSD Energy is responsible for supporting our environmental goals through their actions and suggestions.

Signed

Darren Cripwell

President
